

**Now Available!**  
**Asthma Communications Toolkit for School Leaders**

Dear School Leader:

If a student has an asthma episode in your district, do you or your staff have the communication tools to appropriately and quickly respond to the situation? What policies and practices should be in place to provide a safe environment for students with asthma? How should the district communicate health issues like asthma with students, families and the community? When a crisis occurs, where can you turn?

The AASA/NSBA Asthma Communications Toolkit has the answers to these and other questions. We are proud to announce the online-only publication of this important resource.

View the Toolkit and bookmark it today!
